Phone 0235352900

Website www.agip.com

Email marketing.egypt@agip.com

Abu-Ghazaleh Intellectual Property (AGIP) was established in Kuwait in 1972 under the name of T.M.P Agents at a time when Intellectual Property (IP) protection was still in its early stages of development in the Arab region. However, since our launch, AGIP has consistently been at the forefront of efforts to improve the infrastructure of IP in the Arab world. To this end, AGIP has worked in close coordination with Arab governments and multilateral organizations on introducing an efficient IP system that has brought up significant changes to the region. With the new system, major multinational corporations have been given the confidence to expand to the region and plan major investments, as they are now assured that their investments are appropriately protected. In addition, the creative Arab individuals, such as architects, artists, designers, scientists, musicians and writers, are encouraged to render more creations, as their hard work is properly rewarded and their creations are effectively protected. AGIP also assisted and supported governmental committees and officials charged in revising and drafting new laws and regulations for the enforcement of Intellectual Property Rights (IPRs) in several Arab countries, such as Bahrain, Lebanon, Yemen, Oman, Tunisia and the United Arab Emirates.

Activity sector: Consultancy services, management, marketing, internationalization.
