### "A solar future in the Mediterranean". Presented the MED-DESIRED project (in Bari/Italia)

 5 April, 2014 by IAT in [Featured](#), [News](#) with [Comments Off](#)

The Palace Hotel in Bari (Italia) has just hosted the **International Conference** named "A solar future in the Mediterranean" to officially present to the public audience **MED-DESIRE** (MEDiterranean DEvelopment of Support schemes for solar Initiatives and Renewable Energies).

**MED-DESIRE** is implemented by a consortium of nine partners from five countries (Italy, Spain, Tunisia, Lebanon and Egypt) under the coordination of the Puglia Region – Economic Development, Employment and Innovation Policy Area – Industrial Research and Innovation: the Italian Ministry for the Environment, Land and Sea; the Italian National Agency for New Technologies, Energy and Sustainable Economic Development; the Andalusian Energy Agency; the Andalusian Institute of Technology; the Center of Energetic, Environmental And Technological Investigations – Solar Platform of Almeria; the Tunisian National Agency for Energy Conservation; the Lebanese Center for Energy Conservation; the Egyptian New and Renewable Energy Authority. ARTI – Regional Agency for Technology and Innovation is co-actuator of the project.

All project Partners took part to the **International Conference** in Bari. The event provided the opportunity to discuss the national and international energy policies, the project goals – specifically those related to the removal of existing technical barriers and the implementation of innovative financial schemes for supporting the development of renewable energies – and the business opportunities for solar technologies in the Mediterranean Sea Basin.

The Conference was an opportunity for companies, institutions and national association to exchange information on experiences of cooperation and good practices in the solar energy sector. Finally, it gave to Italian firms the chance to have an insight on the solar market in Mediterranean Partner Countries and to participants from the Partners' member countries to get in touch with Italian potential investors and operators.

Project funded by the EUROPEAN UNION
