

MED-SOLAR, participates in the capitalization event of MED-DESIRE in Seville

On 13th of November, the MED-SOLAR project will participate in the capitalization event of MED-DESIRE project in Seville.

The MED DESIRE ENPI project is organizing a capitalization event " New markets, new challenges for renewable energy and energy efficiency in the Mediterranean Region"

Together with two more ENPI Projects - FOSTERinMed and DIDSOLIT-PB, Antoine Graillet as the representant of the MED-SOLAR project coordinator TTA, will make a speech about the Masreq Energy Development in the second session of the conference, which covers "Opportunities for renewable energy and energy efficiency in the Mediterranean".

The host project. MED-DESIRE, aims to achieve tangible results on these challenges, **removing barriers related to the legal, regulatory, economic and organizational framework of distributed solar energy technologies**. Co-funded by the European Union through the ENPI CBC MED Programme 2007-2013 for an amount of 4.192.000 Euro, the project aims at spreading energy efficiency, and in particular, solar energy across the Mediterranean area through the definition of innovative financial schemes and market stimulation tools. The project will facilitate the take up of distributed solar energy and energy efficiency in the target regions, by achieving an effective cross-border cooperation and by raising public awareness on the related benefits for the environment and for sustainable local development.
