Oggetto: LCEC-Good-to-Know: Meet All EU Energy Projects in Lebanon // New NEEREA Web Site!!

Representatives of 8 EU Projects and Initiatives Meet at i-BEF 2015

- The European Union (EU) is extremely active in the sustainable energy sector in Lebanon and the region. The momentum created by the EU expands from supporting the Lebanese energy sector through the SISSAF project, to developing clear action plans and pilot projects implementations thanks to the ENPI CBC MED funding through the work of four projects (MED-SOLAR, Foster-in-med, SHAAMS, and MED-DESIRE). In addition, the EU is funding the regional project MED-ENEC which is based in Cairo, Egypt, and covers a large part of the Arab countries. The EU also works with municipalities through the CES-MED project, and recently through the SUDEP funding. Representatives of these 8 projects and initiatives will be present at the International Beirut Energy Forum 2015. The i-BEF 2015 will be an opportunity to meet with these representatives and to know how to benefit from the EU support towards a better sustainable future in Lebanon.

LCEC Launches New Web Site for NEEREA

- The LCEC is proud to announce that the new web site of the NEEREA national financing mechanism is now online as per the request of the Central Bank of Lebanon (BDL). Following the approval of the Governor of BDL Mr. Riad Salameh, the web site will also feature a new logo for NEEREA which is now acknowledged worldwide as one of the best financing mechanisms for green energy. The NEEREA web site will include all data and info about NEEREA, templates and documents regarding the preparations of NEEREA loan requests, and also samples of implemented projects under NEEREA as well as results and statistics. The NEEREA web site can accessed through the link: <http://bit.ly/NEEREA-BDL> . All aspects of NEEREA will be discussed during the upcoming Beirut Energy Forum from 9 to 11 September 2015.

The Lebanese Center for Energy Conservation (LCEC) -in its efforts to share with you all the developments that are taking place in the energy efficiency, renewable energy, and green buildings sectors in Lebanon and the region- has setup the "LCEC-Good-to-Know" email information tool. The "LCEC-Good-to-Know" is an email sent regularly by the LCEC including two small infos on the latest events, achievements, publications,
